

Server Hardware Specification for ClearDent 6:

For the best user experience with ClearDent in a larger, more sophisticated office network, we recommend using a dedicated server. The difference in performance is even more significant when advanced modules such as digital imaging and chair-side charting are being used.

NOTE: If you have 5 or more workstations, a dedicated server and a high-speed Internet connection are required.

	Minimum	Recommended
Processor	Intel Core 2 Duo E6600 or AMD AthlonX2 3800+	Two Dual-Core Intel Xeon 5000 sequence processors or Equivalent
